ABSTRACT

This bibliography, which was prepared for use by participants in a series of ten workshops on the "Effective Use of OCLC," includes some of OCLC's own documentation and training materials, news items from the literature citing landmark events in the network's growth, and research studies analyzing OCLC application and/or implementation. It is organized alphabetically by author and title, and a complete bibliographic citation--title, author, periodical source (where applicable), publication date, and number of pages--is given for each item. (Author/MBR)

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC) AND USERS OF THE ERIC SYSTEM."

Kent, 1977

IR006 768

This bibliography was prepared for use by participants in a series of ten workshops on the "Effective Use of OCLC." The programs were designed for mid-management professionals in libraries about to go on-line, or in institutions which had been on-line for less than six months.

The list includes some of OCLC's own documentation and training materials, news items from the literature citing landmark events in the network's growth, and research studies analyzing OCLC application and/or implementation.

While it is unlikely that any individual would have the time to read all the materials cited, many workshop participants found that a slow and careful reading of the list itself provided a sound framework on which to base a good understanding of the network's growth, development and problems. The authors later developed an annotated bibliography which incorporated many of the items listed here and of course, added others. Further updates are planned. The editors will welcome readers' suggestions or additions and corrections.
